

WebDev Quiz 2

Note: Task 1 has to be done by everyone. You have an option between task 2 and 3

Task 1:

Make form for API: Auth/login

Make table for API: Profile/UserProfile (you can use <https://mui.com/material-ui/react-table/#basic-table> – not necessary)

Task 2:

Display FAQ questions list using API: Content Related/Get Faq

Task 3:

Create form using data from: Quiz/Common Quiz Dynamic

Send that data in API: Quiz/Post Quiz

How to POST FormData:

Instead of:

```
const response = await axios.post(
  "http://localhost:8080/user/login",
  {
    // request body
    username: "abc",
    password: "xyz",
  },
  {
    headers: {
      // headers
    },
  }
);
```

Do:

```
// formdata request
const formData = new FormData();
formData.append("username", "abc");
formData.append("password", "xyz");

const response = await axios.post(
  "http://localhost:8080/user/login",
  formData,
  {
    headers: {
      "Content-Type": "multipart/form-data",
    },
  }
);
```
